FOREST PEST MANAGEMENT

Southern Region - Region 8

Report No. 84-3-11 Date: July 23, 1984

AERIAL DETECTION SURVEY OF FOREST INSECT AND DISEASE ACTIVITY,
SUMTER NATIONAL FOREST, LONG CANE DISTRICT, SOUTH CAROLINA

LAND OWNERSHIP OR SURVEY AREA: Sumter National Forest, Long Cane District

STATE: South Carolina

AREA WITHIN SURVEY BOUNDARY: 208,244 acres

DATE: 7/11/84

PERCENT COVERAGE: 50%

AIRCRAFT: Cessna 210

CREW: E. T. Wilson, FPM; Dave Smith & Alvin Feltman, District Personnel

REPORT PREPARED BY: E. T. Wilson

SURVEY OBJECTIVES

The aerial survey was flown to detect any insect or disease activity that would threaten forest resources.

SURVEY RESULTS

No significant insect or disease activity was observed during the survey.

CONCLUSION

Additional surveys should not be required for the remainder of the year unless District Personnel note insect or disease occurrences that would necessitate a reflight.
